

QR code trails

With this activity, you can create QR trails, or you can teach the children to create their own.

If they are creating their own, this adds a number of different dimensions and supports the development of 21st century skills.

- Install an app such as QR Reader
- Access a QR code maker website e.g. QR Code Monkey or QR Generator:
[TinyQR: FREE QR Code Generator](#)
- Choose a website/app/map location or create a piece of text.
- Copy the web address/text into the QR code maker website and create a code.
- Copy the code onto a piece of paper.
- Laminate the codes and spread around the location.
